RoHS Declaration of Conformity

The PCBs manufactured by GS Swiss PCB AG and the packaging used for them meet the requirements of RoHS Directive 2011/65/EU and 2015/863/EU and do not contain any substances, or only within the permitted limits, that fall within the scope of the above Directive.

We are aware of adaptations and the relevant validity dates of the Directive. For this reason, we make sure that our products conform to the latest versions of the Directive.

To the best of our knowledge and conscience, the raw materials we use do not contain any of these substances. However, we do not perform any analyses in this regard and rely on the declarations of conformity provided by our suppliers.

This opinion applies only for the blank PCBs produced by us without a tin-lead surface.

Best regards,
GS Swiss PCB AG
